

Over 20 Years in Business

**M.P. CHEMICALS**  
 The Metal Pretreatment Chemicals

**HOT ZINC PHOSPHATING CHEMICAL**

- Available in Three pack System for highly efficient and fast Zinc Phosphating Coating
- Hot Zinc Phosphating for 100-1000 mg/SqFt coating and for excellent salt spray hours.
- Improve coating adhesion, Best Suitable for paint and powder coating.
- Will improve your products life in harsh conditions to a great extent.

**"Rust-proof your future with zinc phosphating!"**

**Manufacturer of Pretreatment Chemicals**

8 Tank Pretreatment		
	STAGES	Description
1	Degreasing	Heavy Duty Degreasing Powder, which cleans greases, oils, dust, sand and RPOs or cutting oils, and makes metal oil free
2	Water Rinse	
3	Derusting	Organic Derusting Chemical or Mineral acid with AID ARRUST, Which Makes the metal free from all kinds of Metal Oxides formation on the surface including Rust
4	Water Rinse	
5	Surface Activation	Surface Activation is a chemical which encourages the phosphating to grow finer crystals and reduces coating weight and phosphating time.
6	Phosphating	Based on Your Needs, Zinc Phosphating, Iron Phosphating, manganese Phosphating, etc can be used which will provide much better adhesive for topcoat and base metal, Improves Salt Spray Hours, Scratch Test, Complies ASTM Standards.
7	water Rinse	
8	Passivate	Passivation is the process of sealing the pores in the phosphating coating and improves the coating thickness and arrests the moisture content seeking in the content.
9	Hot Air Dip	Which is mainly to remove the water or moisture trapped inside the coating by air drying we can prevent creeping corrosion

**"Achieve superior corrosion resistance and optimal surface preparation with an 8-tank phosphating system!"**

## M.P. CHEMICALS

The Metal Pretreatment Chemicals

Over 20 Years in Business

### Manufacturer of Metal Pre-Treatment Chemicals

#### Materials Available:

- Green 3 in 1
- White 3 in 1
- Special 3 in 1 (MS, Al, plastic, etc)
- Heavy Degreasing powder
- Hot Zinc Phosphating as 3 Pack system
- Cold Phosphating
- Accelerator Toner
- DGS Soft Aluminium Cleaner
- Aluminium Degreasing
- Aluminium Green Chrome
- Passivation Chemical
- Surface Activation
- Acid Arrust (AKA Pickle Aid)
- Organic Derusting
- Mineral Acids

#### Material on Request:

- RPO – Rust Preventive Oil
- Custom 3 In 1
- 2 in 1 (Derust, Degrease)
- 4 in 1 ( Derust, Degrease, Phosphate, Passivate)
- Degreasing Liquid (H and M)
- Cleaning Thiner
- Hot Spray Zinc Phosphating
- Spray Degreasing Chemical
- Iron Phosphating (A and B)
- Aluminium Yellow Chrome
- Phosphating Stripper
- Phosphating Spot Testing Chemical
- Public Detergents
- 5,7,10,12 Stage Tank System Process
- Black Oxide Coating Chemical
- DeepBlack Oxide Coating Chemical
- Chemical Brightner
- Nano Smart Coating
- Phosphating Additives
- Plating Chemicals
- Custom Chemicals on Request

Prices may Vary based in quantity Requeste

We are manufacture of pretreatment chemicals in chennai, we solely prematerials with high putiy and we aimed for quality and performance of chemicals, we also do technical support on all system of metal pretreatment and surface finishing. We also working on improving the product lineup and standars of the productivity.

**Terms and Conditions\*** - Delivery and Packing Will be included for the companies in the chennai and Dates of Delviery will be notified, For Urgent Deliveries with non company Transportaion will not be included. The Payment Is Expected to be cash on Delivery and Rate are Excluding GST. Further Contact The TSC.
