

# Majestic Enterprises Private Limited Profile

Majestic Enterprises Private Limited is engaged in manufacturing Nylocast (Cast Nylon). It was promoted by A. Badrinarayanan, who has wide knowledge in trading and manufacturing, having developed his experience in manufacturing Nylocast since 1982 and direct marketing by 1992 and is now managed by B. Balavignesh and B. Balatamoghna.

We are the manufacturers of Cast Nylon, based on engineering Polyamide (monomer Casting PA-6) under the brand name of NYLOCAST, in the form of Rods, Sheets, Thick-walled tubes, and subsequently machined to customers' specific requirements, such as End cap adapters, Star Wheels, Slipper Pads, Wear Plates, Cam Rollers, Rope way Liners, Gears, Sprockets, Spools, Guide, Kitchen Boards, Clicking Boards, Bushes, Washers, Pulleys, Spacers, etc.

Our Nylocast is an ideal replacement for costly metals such as Gun Metal, Brass, Bronze, White Metal, Aluminum, Teflon, etc., and has a better life compared to the above metals. Nylocast products are being used in various industries such as Bottling plants, Water treatment Plants, Cement, Paper/Paper machinery, Textiles/Textile Machinery, Rubber, Steel, Coal, Mining, Defense, Granite, Automobile, Fertilizer, and Chemicals, Tyre/Tyre machinery, Granites, Windmills, etc.

Under the chemical division of the company, We also manufacture Low Bulk Density Precipitated Aluminium Trihydrate(ATH) as a free flowing white fine powder that has various uses for it's flame retardant, anti-corrosive, thixotropic and pigment-extending qualities.

Our ATH can be used in Emulsions, Paints, Inks, Plastics as well as Coatings. Usage of our material helps in achieving UL94 V0 specification and increasing Limiting-Oxygen-Intake (LOI) of end-use plastics/coatings. As for Emulsions, Paints and Inks, our material can be used to improve both rheology control and cost efficiency due to it's properties.

Our unit is equipped with a well-furnished laboratory for testing and analysis by trained personnel. We have been in the export market since 2000, and we have exported our Nylocast Products to the United Kingdom and the USA.

Recently, there have been vide inquiries and business opportunities for Nylocast in India as well as abroad. Due to recent government policies, there is a wide scope of business opportunities for Nylocast in the textile sectors as well as in steel industries where a wide range of Nylocast components is consumed.

Our factory is situated at Alinjivakkam, Chennai 600 067, Tamil Nadu, India, and our head office is located at N0.23, Flat No.2, 1st Floor Madhavaperumal Koil Street, Mylapore,

Chennai 600004.
